

City & Downtown Solutions

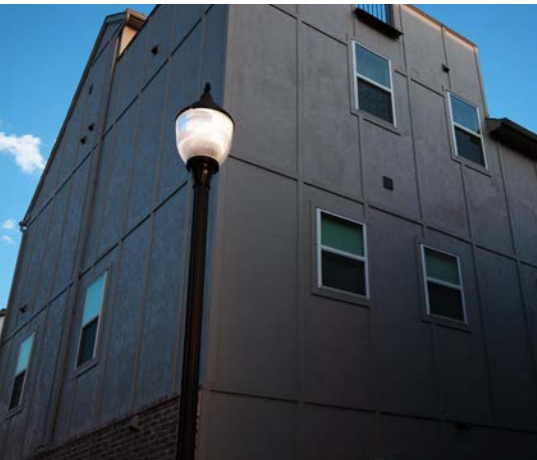

Enhanced streetscapes make areas more inviting, attracting more pedestrians and encouraging them to linger, shop, and dine locally. This increased foot traffic often leads to higher sales for nearby businesses and can make downtowns more attractive to citizens and tourists.

Streetscape Investments Boost Community Health & Morale

Attractive streetscapes promote walking, cycling, and outdoor activity, which can translate into long-term health benefits for residents and lower public health costs. When a city center is designed with character, it creates a place people are proud to call their own. Thoughtful details like quality street lighting, eye-catching signage, and lighted bollards help bring that sense of community ownership to life.

Decorative Street Lighting

Upgraded decorative lamp posts and lighted bollards signal investment and care from the community, which can foster greater pride and engagement. Residents, business owners and visitors who feel invested in their neighborhood are more likely to create vitality and additional economic opportunity.

Eye-Catching Street Signage

Well-designed and consistent signage improves the visual identity of city centers, forming a “sense of place” that attracts visitors and potential new residents. Decorative and customized signs also make the area more aesthetically pleasing and memorable.
